

*The practical management solutions  
for your business, Casio TE-2200 and TE-2400*

■ Electronic Cash Register ■

**TE-2200/ TE-2400**

# Simple yet powerful features and functions increase efficiency of store management and improve productivity

## Receipt and journal printer

58mm wide thermal printers equipped with the capability of graphic logo and watermark, double-height printing for receipts, compressed printing mode for journal printing and a printing speed of 14 lines per second. Drop-in paper loading for easy handling of paper replacement.

## Data storage for your sales reports and program data backup

A CF (Compact Flash) card can be used as a storage device for sales data to create your reports with spreadsheet software to make creating sales reports much easier. A CF card can store program data for backup purposes as well.

## Peripherals

Two serial ports are available for direct connection to a PC, external remote printer, modem for connecting to head office, scanner for barcode reading, or slip printer for printing guest receipts or validation.

## Table control function

Basic table control function is provided for small restaurants, cafés and bars. External printer can be configured for order or receipt printing.

## Help function

The key on the keyboard marked as "HELP" can print guidance messages on the receipt printer which contain answers to frequently asked questions such as how to program the time and date. Furthermore, these messages are customizable to meet individual needs.

## Barcode reading function

The function for direct entry of items not found eliminates the time necessary for searching for new items, thus reducing queues at the register. Items can be added to the master file directly using the associated department name. Direct and batch maintenance functions in the program mode are also available for further processing. The master file can handle newly introduced items according to your program and can be optimized using the inactive items report.
