Clerk Interrupt Function

Clerk interrupt function is available for quick operation required in busy places such as pubs, where terminals are shared by several clerks.

Guest Check Tracking System

Stand alone detailed check tracking functions provide the capability of handling the check items in the food industry and specialty restaurant markets. Up to 200 tables with a variety of items can be controlled.

Scanning Function

The TK-7000 model comes with a scanning capability under stand alone scanning and it can be expanded to 5,000 items by adding optional memory chips.

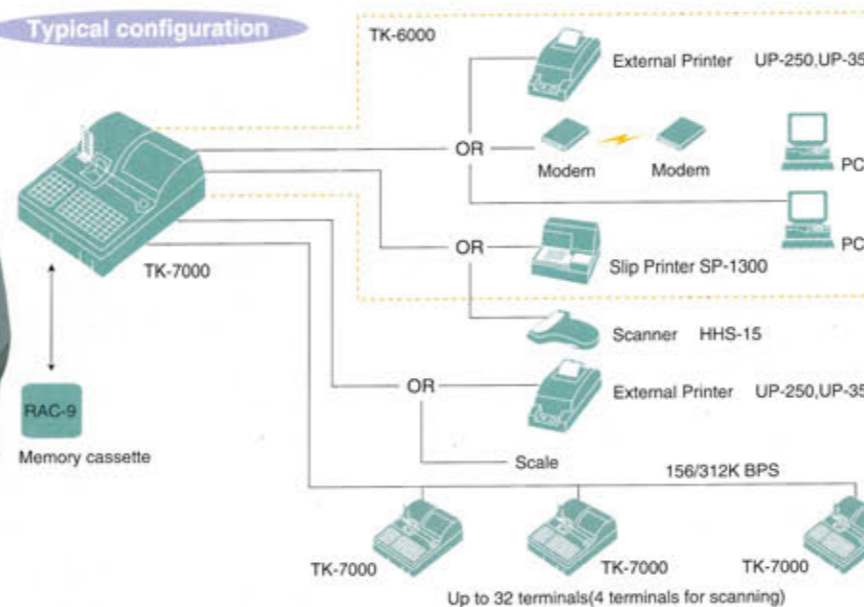

Essential functions for the scanning environment such as Not Found PLU(NFP), PLU batch maintenance file, bottle link and Mix & Match functions are available on the TK-7000 model.

Powerful Registration Tools

- EAT-IN/TAKE-OUT
- EURO
- 10 TAX TABLE(ADD-IN/ADD-ON)
- Hair dresser(clerk change)
- Red price*
- Stock control*
- Bottle link
- Auto check number generation*
- Review
- Media change
- Store/recall*
- Arrangement

*: Available with the TK-7000 only

Typical configuration
